GENERAL NOTES

Scales.
Vertical 1"=5'
Horizontal 1"=50'
Wash borings taken May-June 1938 by C.A. Leory Co, Boston, Mass.
Borings taken for purpose of design and show conditions at boring points only but do not necessarily show nature of the material to be encountered in connection with the construction of the bridge.

Trace of mud at top of blue clay stratum found in all borings.
All borings driven until ledge or boulder was encountered
● Indicates location of dry sample and core borings.
☒ Indicates location of timber pile load test.

Work to be done by Substructure Contractor.
